

WatchGuard Core MDR

Simplify Cybersecurity & Drive Revenue with Managed Endpoint Security

Cybersecurity threats feel out of control, with too many tools and not enough resources to manage them. Finding skilled staff is more challenging than ever. WatchGuard MDR delivers the protection you need for your endpoints and Office 365.

Overview of WatchGuard Core MDR

WatchGuard Core MDR delivers real security for the real world with 24/7, AI-driven protection across endpoints and Office 365. Our solution simplifies cybersecurity, reduces costs, and empowers partners with expert support to drive revenue and confidently defend against evolving threats.

- **Endpoint and Office 365 Protection:** Integrate WatchGuard EDR/EPDR/AEPDR, Panda AD360, and Office 365 into a unified solution supporting manual and automated SOC actions, eliminating multiple tools with inconsistent processes.
- **24/7 SOC:** Improve efficiency, filter out excessive alerts and false positives, reduce alert fatigue, and enable partners to focus on true security challenges.
- **AI/Machine Learning:** Detect threats at machine speed, addressing the limitations of slow, traditional methods.
- **Partner Accelerate (TAMs):** Offer expert technical support to improve customers' security posture and unlock revenue opportunities by guiding partners through complex security challenges.
- **Visibility:** Offer a unified, real-time view of endpoints and Office 365 via the MDR portal.
- **Proactive Threat Hunters:** Provide up-to-date protection against advanced threats, overcoming the challenge of predicting and countering evolving attack methods to build client confidence.
- **Automated Action:** Streamline operations, lower costs, and reduce response times to under six minutes, easing partners' struggles with manual processes and high alert volumes.

The Business Case for WatchGuard Core MDR

Simplify Cybersecurity

- Eliminate guesswork with a 24/7 expert-driven MDR solution that cuts through the clutter of endless security tools and keeps customers protected.

Drive Revenue Growth

- Take advantage of a flexible, ongoing revenue model with quick setup and easy integration that provides immediate value.

Boost Customer Trust and Retention

- Build client confidence with real-time visibility, comprehensive reporting, and effective security, all without the need for in-house staffing.

Access Expert Support

- Benefit from SOC support and dedicated Technical Account Managers (TAMs) for proactive threat response and expert guidance.

Why WatchGuard?

WatchGuard Core MDR offers enterprise-grade security at an affordable price with no hidden costs. It features customizable runbooks, fast onboarding, and a multi-tenant platform for partner control. AI-driven threat management reduces false positives and resolves threats in under six minutes, while expert support and clear reporting streamline operations and boost protection. Save time, minimize noise, and build trust with WatchGuard Core MDR.
